

## GUIDE FOR ACTIVATE PLM CLIENT

When client is not activated a message like this is shown.

To request an activation code you have to copy the number in bold font and send it to us by email.

We can generate the license file starting from that code.

Then we give you that file and to activate plm client you have to open the CADan click on options button:

A form like this will be opened:

Options and User Settings

?

×

Set your local options here :

Activate Verbose Log (it will be active at next start) Info Log ▾
